Cancer and Dread Disease Insurance

Financial Solutions, Treatment and Recovery

THIS IS A CANCER AND DREAD DISEASE - ONLY POLICY

Why Cancer Insurance?

According to the American Cancer Society:

- In the United States, men have about a 1-in-2 lifetime risk of developing cancer; for women the risk is a little more than 1-in-3.*
- Since 1990, over 18 million new cancer cases have been diagnosed.*

As advances in cancer treatment continue, more and more people will survive:

- Approximately 9.6 million Americans with a history of cancer were alive in 2000.*
- The five-year relative survival rate for all cancers combined is 63%.*
- The National Institutes of Health estimated the overall costs for cancer in the year 2003 at \$189.5 billion.

Although health insurance can help offset the costs of cancer treatment, you still may have to cover deductibles and copayments on your own.

Additionally, cancer treatment can cause out-of-pocket expenses that aren't covered by traditional health insurance:

- Travel
- Food
- Lodging
- Long-distance calls
- Childcare
- Household help

Meanwhile, living expenses such as car payments, mortgages or rent, and utility bills continue, whether or not you are able to work. If a family member has to stop working to take care of you, the loss of income may be doubled. Central United Life Insurance Company helps provide an important safety net in fighting the financial consequences of cancer that result beyond traditional health insurance.

Central United Life pays benefits directly to you, unless assigned. You use the cash however you decide.
